

Tertiary Infotech Academy Pte Ltd

UEN: 201200696W

LESSON PLAN

For

Business Process Automation with Power Automate and Copilot Studio Agents

TGS Ref No: TGS-2022017524

Duration: 2 Days · 9:00am – 6:00pm

Conducted by

Tertiary Infotech Academy Pte Ltd

UEN: 201200696W

Version 3.3

DOCUMENT VERSION CONTROL RECORD

Version Number	Effective Date of Release	Summary of Included Changes	Author
1.0	24 Jun 2026	Initial release — 3-day lesson plan (9:00am-5:00pm).	Course Development Team
2.0	2 Jul 2026	WSQ revision — new course title, 9:00am-6:00pm schedule, Day-3 assessment block (WA 1 hr + PP 1 hr), slide mapping for the 108-slide deck.	Course Development Team
3.0	3 Jul 2026	Course restructured from 3 days to 2 days — Day 1: Power Automate, Day 2: Copilot Studio agents ending with the assessment block (WA 1 hr + PP 1 hr, 4:00-6:00pm). Modules 4-5 and Labs 12-16 retired; slide mapping updated for the 86-slide v3 deck.	Course Development Team
3.1	24 Jul 2026	Labs 8-10 updated to paired Microsoft Teams and website experiences covering an ordinary HTTP flow, deterministic agent flow, and guarded AI prompt flow.	Course Development Team
3.2	24 Jul 2026	Day 2 now concludes at Lab 10; the former Lab 11 slot is integrated testing, troubleshooting, comparison and assessment preparation.	Course Development Team
3.3	24 Jul 2026	Reorganised Day 2 into two connected projects: prompt-created IT Support agent upgraded with RAG, followed by one Marina Trust agent progressively upgraded with HTTP, deterministic agent-flow and AI prompt-flow capabilities.	Course Development Team
3.4	24 Jul 2026	Reordered the practical journey from	Course Development Team

		instant and scheduled flows through automated, approval and HTTP flows, then agent creation, RAG, Teams/website deployment, agent flow and prompt flow.

Course Overview

This 2-day, hands-on WSQ course teaches participants to automate real business processes by combining Microsoft Power Automate flows with AI agents built in Microsoft Copilot Studio. Day 1 covers workflow automation concepts and Power Automate; Day 2 covers business agents in Copilot Studio and connecting them to flows. Every topic follows a concept → demonstration → hands-on lab pattern; participants finish with working automations and sit the WSQ assessment at the end of Day 2.

Course Title	Business Process Automation with Power Automate and Copilot Studio Agents
TGS Ref No	TGS-2022017524
Duration	2 Days (9:00am – 6:00pm), incl. 1-hour lunch and tea breaks; assessment on Day 2, 4:00 – 6:00pm
Delivery	Instructor-led, hands-on (physical / virtual)
Audience	Business and operations staff who want to automate repetitive work; no coding required
Prerequisites	Basic Microsoft 365 familiarity (Outlook, Excel); a Power Platform environment (see Lab 0)
Labs	13 step-by-step labs across 2 days (8 on Day 1 and 5 on Day 2), plus 3 concept modules
Assessment	Written Assessment (SAQ) 1 hr + Practical Performance (PP) 1 hr — Day 2, 4:00 – 6:00pm, open book

Learning Outcomes

By the end of the course, participants will be able to:

- Explain business workflow automation and the Trigger → Actions → Output model.
- Build Power Automate flows that send emails, log data to Excel, run approvals, and use scheduled and form triggers.
- Create business agents in Copilot Studio, ground them with knowledge (RAG), and give them tools.
- Connect agents to Power Automate flows and pass structured data between them.
- Combine agents and flows into complete end-to-end business automations (e.g. procurement request handling).

Daily Schedule

The Slides column maps each session to the matching slides in the facilitator deck (Business Process Automation with Power Automate and Copilot Studio Agents-v3.pptx, 86 slides) so trainers can pace delivery against the deck.

Day 1 — Foundations & Power Automate

Workflow concepts + your first five flows.

Time	Duration	Topic / Activity	Method	Slides
9:00 – 9:30	30 min	Welcome, WSQ admin & digital attendance, introductions, ground rules, course overview	Facilitated discussion	1–14
9:30 – 10:00	30 min	Lab 0: Environment Setup — accounts, Course Sandbox environment check	Hands-on lab	15
10:00 – 10:45	45 min	Module 1: Introduction to Workflow Automation — triggers, actions, outputs, steps	Lecture & demo	16–27
10:45 – 11:00	15 min	Tea break	—	—
11:00 – 11:30	30 min	Module 2: Introduction to Power Automate — flow types, common triggers, connectors	Lecture & demo	28–40
11:30 – 12:15	45 min	Lab 1: Instant Email Flow — prompt, manual trigger and dynamic input	Hands-on lab	41–42
12:15 – 12:45	30 min	Lab 2: Instant Excel Flow — inputs, table mapping and fx date	Hands-on lab	43
12:45 – 1:45	60 min	Lunch	—	—
1:45 – 2:20	35 min	Lab 3: Scheduled Flow — Recurrence, time zone and reminder	Hands-on lab	44
2:20 – 3:10	50 min	Lab 4: Automated Form Flow — Forms event, email and Excel	Hands-on lab	45
3:10 – 3:25	15 min	Tea break	—	—

3:25 – 4:10	45 min	Lab 5: Human Approval Flow — pause, decision and branching	Hands-on lab	46
4:10 – 5:00	50 min	Lab 6A: HTTP Enquiry Webhook — website POST and JSON response	Hands-on lab	46
5:00 – 5:45	45 min	Lab 6B: Deterministic Webhook Chatbot — route and return a reply	Hands-on lab	46
5:45 – 6:00	15 min	Day 1 recap: compare instant, scheduled, automated, approval and HTTP triggers	Facilitated discussion	47

Day 2 — Building Business Agents with Copilot Studio & Assessment

Agents, knowledge/RAG, tools, agent + flow end-to-end, then sit the assessment.

Time	Duration	Topic / Activity	Method	Slides
9:00 – 9:15	15 min	Day 1 recap & Q&A	Facilitated discussion	47–49
9:15 – 10:00	45 min	Module 3: Building Business Agents with Copilot Studio — prompt design for structured output	Lecture & demo	50–59
10:00 – 10:40	40 min	Lab 7A: Create the IT Support agent — instructions, boundaries and Preview/Test	Hands-on lab	65–66
10:40 – 10:55	15 min	Tea break	—	—
10:55 – 11:35	40 min	Lab 7B: Ground the IT Support agent — FAQ RAG, citations and evaluation	Hands-on lab	67

11:35 – 12:15	40 min	Lab 8: Deploy the shared Marina Trust agent to Teams and connect the website HTTP flow	Hands-on lab	68
12:15 – 1:15	60 min	Lunch	—	—
1:15 – 2:00	45 min	Lab 9: Teams + Website Agent Flow — both chatbot channels call a deterministic agent flow	Hands-on lab	69
2:00 – 2:50	50 min	Lab 10: Teams + Website Prompt Flow — both chatbot channels call a guarded AI Builder prompt flow	Hands-on lab	60–64, 70
2:50 – 3:00	10 min	Tea break	—	—
3:00 – 4:00	60 min	Integrated testing: compare HTTP, agent and prompt flows; troubleshoot Teams/website channels; Day 2 recap and assessment briefing	Facilitated discussion	71–85
4:00 – 5:00	60 min	Written Assessment (WA / SAQ) — open book	Individual assessment	—
5:00 – 6:00	60 min	Practical Performance (PP) Assessment — open book	Individual assessment	—

Tools & Resources

Microsoft Power Automate	make.powerautomate.com — build and run flows
Microsoft Copilot Studio	copilotstudio.microsoft.com — build and publish agents
Power Platform admin center	admin.powerplatform.microsoft.com — create the Course Sandbox environment (Dataverse)
Microsoft 365	Outlook, Excel (OneDrive), Microsoft Forms

Learner Guide	Full step-by-step guide for every lab (LMS + course GitHub repository)
LMS	https://lms-tms.tertiaryinfotech.com/ — courseware download, TRAQOM, assessment submission

Assessment

The summative WSQ assessment is taken on Day 2, 4:00 – 6:00pm, and is open book (slides, Learner Guide and approved materials only):

- Written Assessment (WA / SAQ) — 1 hour, 4:00 – 5:00pm. Open-ended short-answer questions testing the knowledge from Modules 1–3.
- Practical Performance (PP) — 1 hour, 5:00 – 6:00pm. Candidates build a working flow and agent, mirroring the hands-on labs.
- Assessment flow: TRAQOM survey (QR on the LMS) → Assessment digital attendance → WA then PP → submit answers on the LMS → sign the Assessment Summary Record.
- WSQ funding requires a minimum of 75% attendance AND a Competent (C) assessment outcome.
- Courseware and the assessment are on the LMS: <https://lms-tms.tertiaryinfotech.com/>

Formative assessment is continuous: each lab includes a Checkpoint that the facilitator verifies before the class moves on. Labs 8–10 progressively verify an ordinary HTTP flow, a deterministic agent flow, and a guarded prompt flow across Microsoft Teams and website channels.
