Course Overview

This 3-day, hands-on WSQ course teaches participants to automate real business processes by combining Microsoft Power Automate flows with AI agents built in Microsoft Copilot Studio. Every topic follows a concept → demonstration → hands-on lab pattern; participants finish with working automations, a capstone project of their own, and sit the WSQ assessment on Day 3.

Assessment

The summative WSQ assessment is taken on Day 3, 4:00 – 6:00pm, and is open book (slides, Learner Guide and approved materials only):

- Written Assessment (WA / SAQ) — 1 hour, 4:00 – 5:00pm. Open-ended short-answer questions testing the knowledge from Modules 1–4.
- Practical Performance (PP) — 1 hour, 5:00 – 6:00pm. Candidates build a working flow and agent, mirroring the hands-on labs.
- Assessment flow: TRAQOM survey (QR on the LMS) → Assessment digital attendance → WA then PP → submit answers on the LMS → sign the Assessment Summary Record.
- WSQ funding requires a minimum of 75% attendance AND a Competent (C) assessment outcome.
- Courseware and the assessment are on the LMS: <https://lms-tms.tertiaryinfotech.com/>

Formative assessment is continuous: each lab includes a Checkpoint that the facilitator verifies, and the Day-3 capstone (Lab 16) is presented against the published quality bar (clear trigger, data logged, at least one condition, an approval or AI-generated response, notifications for every outcome, and a tested happy path + branches).
