

PL-7008:

Create agents in Microsoft Copilot Studio

Module 6: Create an agent with Microsoft Copilot Studio and Dataverse for Teams

Microsoft Learn module

Create an agent with Microsoft Copilot Studio and Dataverse for Teams

<https://learn.microsoft.com/training/modules/create-chatbot-power-virtual-agents-dataverse-teams/>

Learning Objectives

After completing this module, you will be able to:

- 1** Publish an agent
- 2** Test the agent in the Demo website
- 3** Create an agent with Microsoft Copilot Studio for Teams app
- 4** Deploy the agent to a Teams channel

Create an agent with Microsoft Copilot Studio for Teams app

Install the Copilot Studio app in Microsoft Teams

Teams app store

- Install app in Teams
- Pin to left-hand rail

Create an agent in Microsoft Teams

Copilot Studio app in Microsoft Teams

- Select the Team to own and manage the agent
- Deployment of the agent is limited to the users in the Team
- Team members only have read access to the agent

Create a copilot

Teams bot

Elevate your channels and groups with a bot designed for Microsoft Teams.

Need a bot you can use outside of the Teams environment? [Start here](#)

Deploy the agent to a Teams channel

Channels

Deploy to Microsoft Teams

- Options to control the appearance of the agent
- Controls how a user can install the agent into a Microsoft Teams team

Teams channel

Turn on Teams

- Connects agent to Teams

Microsoft Teams

Nothing can stop a team, and now your copilot can help you achieve more together. To open the lines of communication, select **Turn on Teams**. After a quick installation, your users and copilot can start chatting. [Learn more](#)

Note that certain copilot content may not appear the same on Microsoft Teams as it was authored in Microsoft Copilot Studio. For details, refer to our article on [supported channel content](#).

Turn on Teams

Cancel

Agent added to Teams

Customize the appearance of the agent

- Icon
- Color
- Description

copilot will appear. Select **Edit details** to modify. Once you are ready, select **Availability options** to continue.

Options for installing an agent into a Microsoft Teams team

Availability options

- Share a link
- Show an agent in the Teams app store
- Download a zip file

Practice Labs

Lab 9: Deploy agent to Microsoft Teams

Knowledge Check

Knowledge Check

*Create an agent
with Microsoft
Copilot Studio*

Module 5

1. Use your PC or mobile device
2. Go to (*insert polling app link of your choice*)
3. Enter code: **123-45-678**
4. Please participate

Which one?

- A. None
- B. A little
- C. Lots

Knowledge Check

1 Which app would you use to create and manage agents in Dataverse for Teams?

- ✓ Microsoft Copilot Studio for Teams
- Microsoft Copilot Studio for Web
- Power Apps for Teams
- Power Automate for Teams

Solution

Answer=A

Knowledge Check

2 You have a new agent that you want your team to start using. Everyone on your team is already a member of the team that is associated with the agent. How do you share the agent so they can install it from the “Built by your colleagues” section in Teams?

- Provide the share link for the agent
- ✓ Publish the agent and then select Add to Teams when you're sharing the agent by using Microsoft Copilot Studio for Teams.
- Add the team members to the security group that is associated with the agent.
- Submit the agent for admin approval after you publish the app in Microsoft Copilot Studio for Teams.

Solution

Answer=B

Knowledge Check

3 What can you change in the appearance of your agent when you deploy it to a Teams channel

- How adaptive cards are displayed
- ✓ Icon displayed when a user asks questions in the agent
- Language used by the agent
- Order of the values in a multiple choice entity

Solution

Answer=B

Summary

- Agents must be published to share with others and deploy to users
- Agents can be deployed to Microsoft Teams or created within Microsoft Teams

Module Recap

In this module, we:

Learned how to publish and test an agent

Learned how to create an agent in Microsoft Teams

Learned how to deploy an agent to a Microsoft Teams team

Thank you.
